H. IDPH Waiver of Complete Lead Service Line Replacement

## LIST OF DEFINITIONS & ABBREVIATIONS

**Action Level (AL):** The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow. The current Action Level for lead is 15 parts per billion, in accordance with the Lead and Copper Rule.

**Community Water System/Supply (CWS):** A public water system that supplies water to the same population year-round.

**Corrosion Control Treatment (CCT):** A treatment designed to reduce the corrosivity of water toward metal plumbing materials, particularly lead and/or copper.

**Emergency Repair:** Any unscheduled water main, water service, or water valve repair or replacement that results from failure or accident.

**Galvanized Requiring Replacement (GRR):** Galvanized service line that is or ever was downstream of an LSL or is currently downstream of an unknown service line. (Service lines classified as GRRs are considered lead service lines for the purpose of this plan).

**Illinois Lead Service Line Replacement and Notification Act (ILSLRNA):** Illinois law requiring CWS to create a material inventory, create a LSLR Plan, provide notice to potentially affected building occupants, prohibit partial LSLR, and disconnect LSLs from drinking water supply.

**Lead:** A naturally occurring element found in small amounts in the earth's crust; while it has some beneficial uses, it can be toxic to humans and animals, causing health effects.

**Lead and Copper Rule (LCR):** Federal law established by U.S. Environmental Protection Agency to protect public health and reduce exposure to lead in drinking water.

**Lead Service Line (LSL):** A service line made of lead or a service line connected to a lead pigtail, lead gooseneck, or other lead fitting.

**Full Lead Service Line Replacement (LSLR):** Replacement of a lead service line (or galvanized service lines requiring replacement) that results in the entire length of the service line, regardless of ownership, being free of lead.

**Material Inventory:** A service line material inventory developed by a community water supply under the ILSLRNA.

**Solder:** A type of metal used to join metal parts such as section of pipe, without melting the existing metal and the parts to be joined.

**Service Line:** Piping, tubing, and necessary appurtenances acting as a conduit from the water main or source of potable water supply to the building plumbing at the first shut-off valve or 18 inches inside the building, whichever is shorter.

**Suspected Lead Service Line:** A service line that a CWS finds more likely than not to be at least partially made of lead.

**Water Main:** A pipe that conveys water to a connector or customer's service line.

# **1. INTRODUCTION**

Under the Illinois Lead Service Line Replacement and Notification Act (ILSLRNA) and the Lead and Copper Rule Revisions (LCRR), the Village of Antioch is required to ensure that all lead service lines and galvanized steel service lines requiring replacement are replaced or disconnected from the Village's drinking water supply.

Lead service lines (LSLs), which connect homes to the water main, can corrode and release lead into drinking water. Children and pregnant women are most at risk to the serious health effects of lead. Under ILSLRNA, the Village plans to remove all connected LSLs in its corporate limits by 2038 at the designated replacement rate of 7% per year, as set by the IEPA.

The ILSLRNA requires the Village of Antioch to submit a draft Lead Service Line Replacement Plan by April 15, 2024 (the Village of Antioch was granted an extension with a submission date of September 1, 2024) and submit annual updates to the draft plan by April 15<sup>th</sup> of 2025 and 2026. A final Lead Service Line Replacement Plan must be submitted by April 15, 2027.

The Village's current inventory of water services shows 4,939 service lines connected to the system including 207 services that have been identified as lead or galvanized requiring replacement and 2 of unknown composition.

## **2. SYSTEM OVERVIEW**

### **2.1 Location & Customer Base**

The Village of Antioch (Identification #IL0970050) is in Antioch Township, Lake County and is approximately 57.5 miles northwest of Chicago, Illinois. According to the 2020 Census, the Village covers 8.21 square miles.

Per the 2020 Census, the Village of Antioch had a population of 14,622 with a median age of 39.5 and median household income of \$112,546. Approximately 80.5% of the Village is White (Non-Hispanic), 8% are Hispanic, 4.5% Black or African American and 4.1% are Asian (Non-Hispanic).

### **2.2 Water System Overview**

The Village of Antioch oversees the operation, maintains and provides repairs to all public water distribution mains, valves, water service lines, b-boxes, fire hydrants and appurtenances, including replacement, inspections and sampling

of the water distribution system. The Village also operates and maintains nine wells, four elevated towers, one storage tank and one water treatment plant.

The Village of Antioch has consistently met all Illinois Environmental Protection Agency (IEPA) standards. A Consumer Confidence Report (CCR) is published annually.

The Village performs testing for lead throughout the distribution system. Currently, the Village samples for lead at 30 sites every 3 years, as mandated by the EPA.

### **3. LEAD SERVICE LINE REPLACEMENTS**

#### **3.1 Service Line Material Inventory**

Currently, the Village of Antioch has identified 4,939 service lines within its distribution system and has identified 207 lead service lines and 2 of unknown composition being treated as lead for the purposes of this plan. Since 2020 a total of 9 lead service lines have been replaced. A map of the locations of all service lines that have been identified as lead or unknown are available at <https://www.arcgis.com/apps/webappviewer/index.html?id=1273d3491e4a4102889169796ca4d65c>. The inventory also contains the location of service lines that were lead but have been replaced since 2020 (Appendix A). The map (Appendix B) shows the locations of the remaining service lines that are either identified as lead, galvanized requiring replacement or unknown along with the sequence of areas to be inventoried and lead service lines replaced.

#### **3.2 Replacement Schedule**

The Village has identified a total of 4,939 lines, 207 lead and 2 of unknown composition requiring replacement to date. Per the LSLRNA, the State of Illinois has set Annual Replacement Rates based on the number of LSLs in a given Community Water System (CWS). The Village of Antioch will be required to meet a 7% annual rate of replacement starting in 2027 with all replacements being complete by the year 2038 (Appendix C).

#### **3.3 Prioritization of Lead Service Lines**

The Village recognizes that some facilities, such as preschools, day care centers, day care homes, group day care homes, parks, playgrounds, hospitals, and clinics may represent an increase in lead exposure to children, who are the most susceptible to the effects of lead.

Village records shows 1 lead service line at a high-risk facility which will be addressed in the first round of replacements.

## 4. LEAD SERVICE LINE REPLACEMENT COST

The replacement cost of lead service lines can vary depending on factors, such as:

- The length of service from the Village main to the home
- The size of the service line
- If the replacement will require open excavation and any necessary restoration
- The location and accessibility of the water service within the home or business served

The Village has developed the following estimated costs for lead service line replacement:

- Public side (water main to shut-off valve): \$5,000 to \$11,000
- Private side (shut-off valve to building): \$5,000 to \$11,000

Based on these initial costs, the Village anticipates service line estimated replacement costs of \$2,057,000.

The Village plans to fund replacement of all public lead service lines (LSLs) with projected future cash flow from utility customers. Efforts will be made to seek any available grant funding directly offsetting the cost of LSLs. The Village remains open to considering the IEPA's revolving loan fund, particularly if principal forgiveness to municipalities with similar demographics as the Village of Antioch is an option in the future.

While the Village does not have the financial resources to pay for the customer-owned portion of water service lines, it makes every effort to encourage residents to replace their portion and will obtain pricing for the companies with which it contracts to replace the Village-owned portion to create economies of scale, a measure that could make LSL replacements more affordable. Ultimately, this affordability in getting service lines replaced should help prevent service shutoffs. Property owners will be under no obligation to use the Village's contractor in the event they can obtain better pricing. Payment arrangements will be evaluated on an annual basis as outside funding sources and economics change over time.

The responsibility for the cost of lead services lines in the Village is as follows:

- In accordance with the ILSLRNA, the Village is responsible for 100% of the cost of when the replacement is part of an emergency repair.
- Public Side Replacements: The Village will cover the cost of all public side replacements. This includes the segment of the lead service line from the water main to the buffalo box (b-box).

- Private Side Replacements: Property owners will be responsible to cover the cost of all private side replacements. The private side is defined as the segment from the buffalo box to the water main.
- If a property owner desires a larger service line, the cost associated with it is the responsibility of the property owner and must have Village approval.

When bidding water main replacement projects that include lead service line replacements, the bid documents will be designed to accommodate the replacement of the entire lead service line. Property owners will have the opportunity to participate in the replacement process with the Village's contractor. Alternatively, property owners can choose to seek a contractor independently to complete the private side replacement.

The same principles apply to years when the Village bids out for private contractors to complete only lead service line replacements. Property owners will still have the opportunity to engage with the Village's contractor for the replacement of their private service line. This dual approach ensures flexibility for property owners while maintaining transparency and adherence to the established cost-sharing policy.

Village led contracts for lead service replacements will contain measures to encourage diversity in hiring in the workforce required to implement the plan in compliance with 415 ILCS 5/17(q)(22).

## **5. REPLACEMENT PROCEDURES**

### **5.1 Village Initiated Replacement Procedure**

Proactive communication channels are established to inform residents about the Lead Service Line Replacement (LSLR) Programs as the Village's scheduled replacements near the year of replacement. The Village will use a multi-faceted approach, incorporating the website, newsletters, mail, and direct communication with property owners. Through these channels, the emphasis will be on the state mandate, shared responsibility of property owners, and the specific details regarding lead service replacements.

The Village will utilize one of these three common methods: open cut excavation, trenchless methods, or pipe pulling/pipe splitting. The exact method of replacement will vary depending on site restraints or equipment available. When feasible, the Village will avoid open cut excavation and opt for a less disruptive method such as trenchless or pipe pulling/pipe splitting.

### **5.1.1 Scheduled Replacement**

A scheduled replacement is when the Village has an upcoming project, such as a watermain replacement project or a specific lead service line replacement project, where lead water service lines are known or suspected and will be disturbed, requiring full replacement of the service line.

- At least 45 days prior to replacement, the Village shall contact the property owner, by mail, of the potentially affected service line to request access and permission to replace the LSL.
  - a. If the owner does not respond within 15 days, the Village shall post the request on the building entrance.
  - b. If the property owner denies access, the property owner shall sign the Illinois Department of Public Health (IDPH) waiver (Appendix H).
  - c. If the property owner fails to respond, the Village shall notify IDPH.
- At least 14 days prior to replacement, the Village shall notify the owner and occupants of the upcoming replacement by mail, posted at entrance, or electronically.
- At the time of replacement, the Village may replace the lead service line within the same trench, even if water-sewer separation requirements are not met, so long as the water service line is either encased or Type K Copper is used, and there is no observed lead on the sewer service per IDPH Sewer/Water Service Separation Variance.
- Within 24 hours of replacement, the Village shall notify the property owner and occupants of the executed replacement. The notification shall include:
  - a. The possibility of increased levels of lead (Appendix D)
  - b. Best practices to reduce lead in drinking water (Appendix E)
  - c. Information regarding the dangers of lead to young children and pregnant women: <https://www.epa.gov/ground-water-and-drinking-water/basic-information-about-lead-drinking-water>

### **5.1.2 Emergency Replacement**

An emergency replacement is when the Village or property owner disturbs a lead service line during unplanned maintenance, such as a water main break or water service line leak. The Village or property owner may temporarily repair the lead service line and maintain water service, however by disturbing a lead service line, full replacement will then be required.

1. At the time work is initiated, the Village shall notify the property owner and occupants by mail, posted at entrance, or electronically of the lead service line and provide a Point-of-use Filter or Pitcher Filter meeting NSF/ANSI 53 and NSF/ANSI 42 requirements and provides up to 6

months of filtration. Due to the potential of increased lead levels, the notification shall include:

- a. Best practices to reduce lead in drinking water (Appendix E)
  - b. Information regarding the dangers of lead to young children and pregnant women: <https://www.epa.gov/ground-water-and-drinking-water/basic-information-about-lead-drinking-water>
  - c. Information on how to use the provided filter (Appendix F)
  - d. Information on the required upcoming full replacement and required coordination efforts. (Appendix G)
2. From the time of the repair, the Village has 30 days (or 120 days in the event of weather or other circumstances beyond reasonable control that prohibits construction) to facilitate the full replacement of the lead service line.
- a. If the property owner denies access, the property owner shall sign the Illinois Department of Public Health (IDPH) waiver (Appendix H)
  - b. If the property owner fails to respond, the Village shall notify IDPH.

## **5.2 Customer Initiated Replacement Procedure**

In the event the property owner intends to replace their lead service line or galvanized line requiring replacement, they are required to provide notice to the Village and secure a permit. Under the LSLRNA, if the customer intends to replace a portion of their lead service line, they must notify the Village of Antioch at least 45 days before commencing work.

## **6. CONCLUSION**

In conclusion, the Lead Service Replacement Plan for the Village of Antioch is a comprehensive strategy to meet the State of Illinois' mandate for the removal of all lead service lines by 2038. The Village's goal is to ensure a systematic and efficient approach that aligns with legal requirements and prioritizes the well-being of the community.

**URGENT**

**RE: Water Service Line Material Identification**  
**Service Address: {Service Address}, Antioch, IL**

Dear {Resident Name}:

The Environmental Protection Agency (EPA) recently revised the Lead and Copper Rule pertaining to community drinking water. All municipalities are now required to develop and maintain an inventory of all water service line materials.

We are requesting your assistance with determining if your home has a lead, galvanized steel, copper or plastic service line. Additional information can be found on the back of this letter to assist you with identifying your service line material.

For your convenience, you may submit your service line information one of the following ways:

- Complete the enclosed survey and drop it off or mail it to the Village Hall at 874 Main Street.
- E-mail the Water Department at [waterdept@antioch.il.gov](mailto:waterdept@antioch.il.gov) (please include your name, address, daytime phone number, and, if possible, a picture of your service line and water meter).
- Complete the online Lead/Copper Survey <https://www.antioch.il.gov/lead-service-line-replacement/>.
- Contact the Public Works Department at 847-395-1881 to set up an appointment for the Water Department to inspect your service line.

**Please respond no later than January 31, 2024. Non-compliance may be subject to disconnection of your water service until the required information has been collected (Village Ordinance, Section 8-1-9).**

Thank you for your attention and cooperation with this matter.

Sincerely,  
Village of Antioch  
Water Department

# How to Identify Water Service Line Material

**Tools needed:** Flathead Screwdriver, Refrigerator Magnet, and a Penny

**Step One:** **Locate the water service line coming into the building.**  
This is typically found in the basement. A valve and the water meter are installed on the pipe after the point of entry.

Identify a test area on the pipe between the point where it comes into the building and the valve. If the pipe is covered or wrapped, expose a small area of metal.

**Step Two:** **Scratch the surface of the pipe.**  
Use the flat edge of the screwdriver to scratch through any corrosion that may have built up on the outside of the pipe.

DO NOT use a knife or other sharp instrument and take care not to puncture a hole in the pipe.

**Step Three:** **Compare your findings to the chart below.**  
Each type of pipe will produce a different type of scratch, react to the magnet differently and produce a unique sound when tapped with a metal coin.

**NOTE:** The incoming water service can either come up from the basement floor or through the foundation wall. If you do not have a basement, the incoming water service should come up through the floor on the main level of your home.

**Lead Pipes**

**The Scratch Test**  
If the scraped area is shiny and silver, your service line is lead.

**The Magnet Test**  
A magnet *will not* stick to a lead pipe.

**The Tapping Test**  
Tapping a lead pipe with a coin will produce a dull noise.

**Copper Pipes**

**The Scratch Test**  
If the scraped area is copper in color, like a penny, your service line is copper.

**The Magnet Test**  
A magnet *will not* stick to a copper pipe.

**The Tapping Test**  
Tapping a copper pipe with a coin will produce a metallic ringing noise.

**Galvanized Pipes**

**The Scratch Test**  
If the scraped area remains a dull grey, your service line is galvanized steel.

**The Magnet Test**  
A magnet *will* stick to a galvanized pipe.

**The Tapping Test**  
Tapping a galvanized pipe with a coin will produce a metallic ringing noise.

**RE: Service Address: 123 Main Street Antioch, IL**

**Notice of Lead Service Line Material**

Dear:

Per the Lead Service Line Replacement and Notification Act (LSLRNA), (Public Act 102-0613) municipalities are required to notify water customers when it is known they are served by a lead water service line. The service line is a portion of pipe that connects the water main to the building/home inlet. Per Village Ordinance 13-1-2 (C) the water service line from the building to the curb stop is the full responsibility of the property owner or occupant. (Please see diagram to the right.)

While the quality of water provided to your service line is safe, our recent service line material inventory has revealed a lead water service line at your location. We would like to assure you that the drinking water supplied is safe and rigorously tested on an ongoing basis. The Village of Antioch's water supply has consistently met all Illinois Environmental Protection Agency standards. The Village publishes an annual water quality report, called the Consumer Confidence Report (CCR). To view the Village's current CCR, please visit our website at <https://www.antioch.il.gov/departments/public-works/>.

Currently Village Officials and Staff are discussing options to comply with the replacement requirements mandated by the EPA. Additional information will be provided once a complete service line replacement plan has been finalized and approved by the EPA.

Enclosed is a flyer provided by the EPA with information about lead in drinking water. For additional information, please visit the EPA's website at <https://www.epa.gov/ground-water-and-drinking-water/basic-information-about-lead-drinking-water>. You may also contact the Water Department at 847-395-1881 if you have any further questions.

RE: Service Address: 123 Main Street Antioch, IL

**Notice of Galvanized Service Line Material**

Dear:

Per the Lead Service Line Replacement and Notification Act (LSLRNA), (Public Act 102-0613) municipalities are required to notify water customers when it is known they are served by a lead water service line or a galvanized water service line if the galvanized service line is or was connected downstream to lead piping. The service line is a portion of pipe that connects the water main to the building/home inlet. Per Village Ordinance 13-1-2 (C) the water service line from the building to the curb stop is the full responsibility of the property owner or occupant. (Please see diagram to the right.)

While the quality of water provided to your service line is safe, our recent service line material inventory has revealed a galvanized water service line at your location. We would like to assure you that the drinking water supplied is safe and rigorously tested on an ongoing basis. The Village of Antioch's water supply has consistently met all Illinois Environmental Protection Agency standards. The Village publishes an annual water quality report, called the Consumer Confidence Report (CCR). **RE: Important Information about your Drinking Water  
Service Address: {Service Address}, Antioch, IL**

Dear {Resident Name}:

The Village of Antioch has replaced a portion or entire length of the water service line to your home. Because the original pipe was made of lead, some lead may have been released into the water during construction. Please take the following steps to minimize your exposure to any lead that may have been released. Subsequent flushing by the customer should be done once every two weeks for three months.

Flush all faucets using these steps:

1. Remove faucet aerators from all cold water taps in the home including the shower heads, laundry tubs, outdoor hose-bibs, bathtubs and slushing points.
2. Beginning in the lowest level of the home, fully open the cold water taps throughout the home, then open the faucets on next highest floor of the house. Continue until faucets are open on all floors. Leave all faucets running at the highest rate possible.
3. Let the water run for at least 30 minutes at the last tap you open (top floor).
4. Turn off each tap starting with the taps in the highest level of the home. Be sure to run water in bathtubs and showers as well as faucets.
5. Do not consume tap water, open hot water faucets, or use icemaker or filtered water dispenser until after flushing is complete.
6. Clean aerators/screen at each faucet. You may need to replace aerators/screens if too old or worn. To clean aerators, cover the drain in your sink to prevent any aerator parts from falling into the drain, then unscrew the aerator and separate each part. Remove any small particles on the screen, soak the parts in white vinegar for a few minutes, and scrub the parts with a brush. After cleaning, put the aerator parts back together and screw the aerator back onto the faucet.
7. Customers shall be advised not to use hot water in the premise plumbing until initial flushing is completed to prevent sedimentation of lead particles in premise hot water tanks.

Attached to this notice is a filter for water to be used for drinking and cooking, particularly if you are pregnant or have children under age six. This filter will last for 6 months as required by the IEPA. More information about filters can be found on the EPA's website at <https://www.epa.gov/system/files/documents/2024-06/how-to-id-filters-certified-to-reduce-lead-in-drinking-water>.

Thank you for your help with this project so we can take the necessary steps to ensure all our water customers have safe water. Please contact the Water Department at 847-395-1881 with any questions.

Sincerely,  
Village of Antioch  
Water Department

CONCERNED ABOUT LEAD IN YOUR DRINKING WATER?

# Sources of LEAD in Drinking Water

## Reduce Your Exposure To Lead

Use only cold water for drinking, cooking and making baby formula. *Boiling water does not remove lead from water.*

Regularly clean your faucet's screen (also known as an aerator).

Consider using a water filter certified to remove lead and know when it's time to replace the filter.

Before drinking, flush your pipes by running your tap, taking a shower, doing laundry or a load of dishes.

To find out for certain if you have lead in drinking water, have your water tested.

## Replace Your Lead Service Line

Water systems are required to replace lead service lines if a water system cannot meet EPA's Lead Action Level through optimized corrosion control treatment.

Replacement of the lead service line is often the responsibility of both the utility and homeowner.

Homeowners can contact their water system to learn about how to remove the lead service line.

## Identify Other Lead Sources In Your Home

Lead in homes can also come from sources other than water. If you live in a home built before 1978, you may want to have your paint tested for lead. Consider contacting your doctor to have your children tested if you are concerned about lead exposure.

For more information, visit: [epa.gov/safewater](http://epa.gov/safewater)

# Consumer Tool for Identifying Point-of-Use and Pitcher Filters Certified to Reduce Lead in Drinking Water

## Point-of-Use Filters

Point-of-use, or POU, water filters remove impurities from drinking water at the point that it is actually being used. Although there are others, the POU filters covered in this document are those that are used in filtration systems that are attached directly to water faucets or those inserted into refrigerators for water and ice dispensers.

### Faucet Filter Device

### Refrigerator Filter

## Pitcher Filters

Pitcher water filters remove impurities from drinking water and are those that are inserted into water pitchers and bottles.

### Pitcher With Filter

### Bottle With Filter

## Why is certification important for water filters?

Consumers can increase their level of confidence by purchasing POU and pitcher filters that have been evaluated by an accredited third-party certification body or bodies for drinking water lead reduction to 5 parts per billion (ppb) or less and particulate reduction (Class I) capabilities.

## How do I know if a filter is certified to reduce lead?

There are several American National Standards Institute (ANSI) accredited third-party certification bodies that evaluate POU and pitcher filters for lead reduction in drinking water. They each have unique certification marks (registered trademarks) that are used on certified products.

Certification bodies require their mark and a statement indicating testing against **NSF/ANSI Standard 53 along with a claim of lead reduction**. It is recommended that you also look for filters tested against **NSF/ANSI Standard 42 for particulate reduction (Class I)**.

## Certification Marks

Below are the ANSI accredited third-party certification bodies' approved certification marks and the text that indicates a filter has been evaluated for lead reduction capabilities. Some filters can be certified by more than one certification body and have multiple certification marks.

**See page 2 for information on where to find marks and claims of reduction.**

NSF product listing directory [info.nsf.org/Certified/DWTU/](http://info.nsf.org/Certified/DWTU/)

WQA product listing directory [find.wqa.org/find-products/](http://find.wqa.org/find-products/)

IAPMO R&T product listing directory [pld.iapmo.org](http://pld.iapmo.org)

UL Solutions product listing directory [productig.ulprospector.com/en](http://productig.ulprospector.com/en)

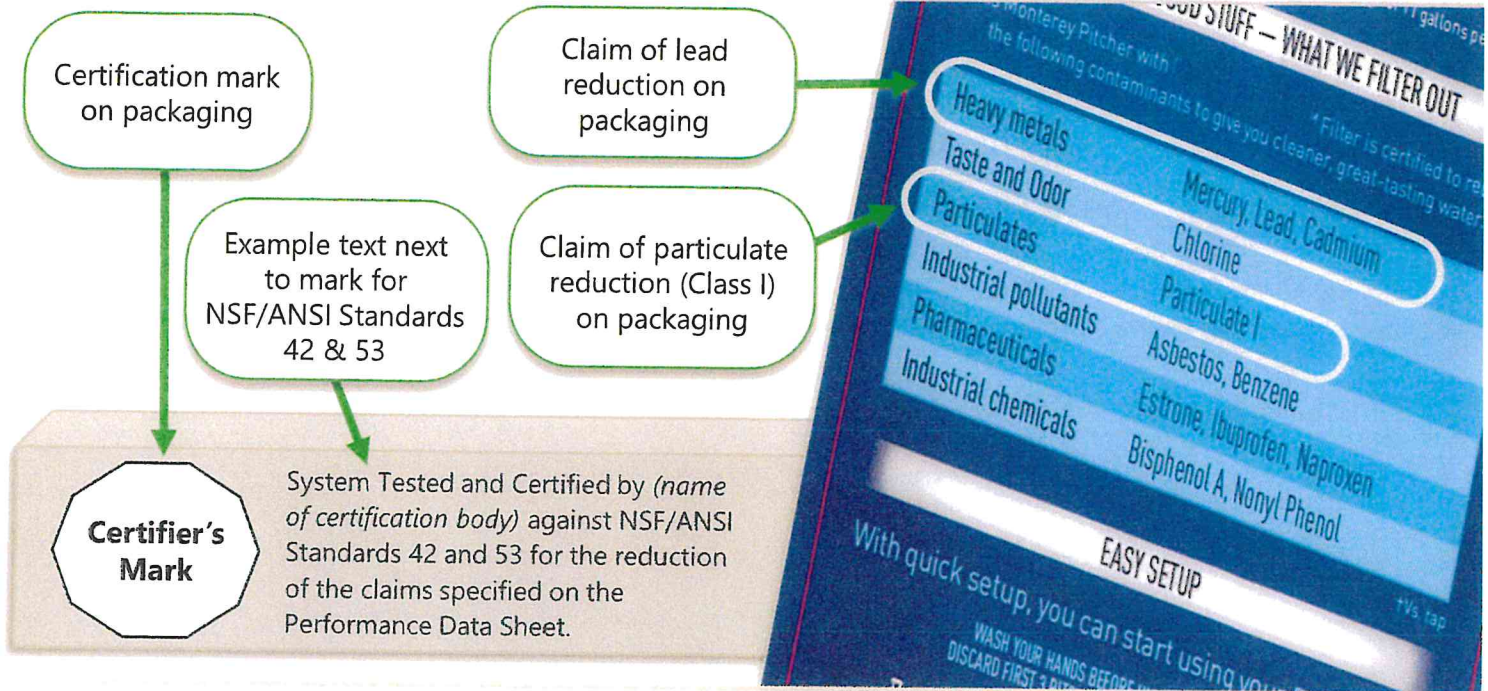

CSA product listing directory [csagroup.org/testing-certification/product-listing](http://csagroup.org/testing-certification/product-listing)

## Text for NSF/ANSI Standards 42 & 53 next to certification marks:

- ◆ Example text on packaging: *Tested and Certified by (certification body) against NSF/ANSI Standards 42 and 53 for the claims specified on the Performance Data Sheet.*
- ◆ Some companies may indicate lead removal in the text or may simply state NSF/ANSI 53 or NSF/ANSI 42 above or below the mark.

## Certification Marks, Standards Text, and Claims of Reduction on Filter Packaging

Certification marks (page 1) can be found on the filter packaging, the filter, or on the smallest container in which the filter is packaged. Examples of certification marks, NSF/ANSI Standards 42 and 53 text, and claims of lead reduction and particulate reduction (Class I) as found on product packaging are shown below.

## Claims of Reduction on Performance Data Sheets

Claims of lead reduction to 5 parts per billion (ppb) or less and particulate reduction (Class I) not included on the filter packaging can typically be found on the performance data sheet (example below) located inside the filter packaging, in the certifier's online product listing directory (see page 1), or on the manufacturer's website.

| SUBSTANCE   | Overall Percent Reduction | Influent Challenge Concentration | U.S. EPA Level*/NSF Maximum Permissible Product Water Concentration |
|---|---------------------------|----------------------------------|---|
| <b>NSF/ANSI Standard 53 – Health Effects</b>                              |                           |                                  |   |
| Lead pH 6.5   | 99.5%                     | 150±15 ppb                       | 5 ppb   |
| Lead pH 8.5   | 99.6%                     | 150±15 ppb                       | 5 ppb   |
| Mercury pH 6.5  | 95.5%                     | 6±0.6 ppb                        | 2 ppb   |
| Mercury pH 8.5  | 95.9%                     | 6±0.6 ppb                        | 2 ppb   |
| Cadmium pH 6.5  | 97.4%                     | 30±3 ppb                         | 5 ppb   |
| Cadmium pH 8.5  | 99.2%                     | 30±3 ppb                         | 5 ppb   |

### Questions?

- About a filter: Refer to the certifier's product listing directory on page 1 or contact the manufacturer.
- About this document: Send an email to [latham.michelle@epa.gov](mailto:latham.michelle@epa.gov) and [tully.jennifer@epa.gov](mailto:tully.jennifer@epa.gov).

## Lead Information Notice

### IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

The Village of Antioch will soon begin a water line maintenance and/or construction project that may affect the lead concentrations in your drinking water. Lead, a metal found in natural deposits, is harmful to human health, especially young children, and pregnant women. It can cause damage to the brain and kidneys and can interfere with the production of red blood cells that can carry oxygen to all parts of your body. The most common exposure to lead is swallowing or breathing in lead paint chips and dust. However, lead in drinking water can also be a source of lead exposure. In the past, lead was used in some water service lines and household plumbing materials. Lead in water usually occurs through corrosion of plumbing products containing lead; however, disruptions (construction or maintenance) of lead service lines may also temporarily increase lead levels in the water supply. This disruption may be sometimes caused by water main maintenance/replacement.

The purpose of this notice is for informational purposes only. While it's not known for certain whether this construction project will adversely affect the lead (if present) plumbing in and outside your home, below describes some information about the project and some preventative measures you can take to help reduce the amount of lead in drinking water.

Project start date: \_\_\_\_\_ Expected completion date: \_\_\_\_\_

Project location and description:

---

---

What you can do to reduce lead exposure in drinking water during this construction project:

- Run your water to flush out lead.
- Use cold water for drinking, cooking and preparing baby formula. Do not cook with or drink water from the hot water tap; lead dissolves more easily into hot water. Do not use water from the hot water tap to make baby formula.
- Attached to this notice is a filter for water to be used for drinking and cooking, particularly if you are pregnant or have children under age six. This filter will last for 6 months as required by the IEPA. More information about filters can be found on the EPA's website at: <http://www.epa.gov/system/files/documents/2024-06/how-to-id-filters-certified-reduce-lead-in-drinking-water>
- Clean and remove any debris from faucet aerators on a regular basis.
- Do not boil water to remove lead. **Boiling water will not reduce lead.**
- Purchase lead-free faucets and plumbing components.
- Remove the entire lead service line.

**RIGHT OF ENTRY AND RELEASE  
FOR LEAD SERVICE LINE REPLACEMENT  
Village of Anytown, ILLINOIS**

The Village of Anytown (“Village”) is initiating a program to replace lead service lines on your property. The service lines run from the buffalo box to the inside of your home. The Village requests that you, as the owner (“Owner”) of your property (“Property Owner”); or that you as lessee, renter, or otherwise legally occupying the home (“Occupant”), sign, complete, and return this document (“**Right of Entry**”) to grant the Village’s Water Division representatives (“Village Representatives”) a right of entry onto your property, which has the street address of \_\_\_\_\_ to provide Your Property with a “**Lead Service Line Replacement**”.

**REASON FOR THE VILLAGE’S REQUEST FOR A RIGHT OF ENTRY:**

**LEAD SERVICE LINE REPLACEMENT:** The Village’s records indicate that the pipe from the buffalo box to Your Property may be made of lead or galvanized pipe. A water service line that is made of lead, also known as a lead service line, can increase your risk of exposure to lead through drinking water and should be replaced if possible. The Village is preparing to replace the homeowner portion of the service line that serves Your Property from the buffalo box onto and in Your Property. This is referred to as “**Lead Service Line Replacement.**”

The Village Representatives will need access to the Property to perform work associated with the Lead Service Line Replacement (“Work”). The Village Representatives will show you their respective identification prior to entering the Property.

This Work involves shutting off water service for an estimated four (4) hours, replacement of existing lead or galvanized pipe water service, installation of a new copper service from the buffalo box, onto your property, into the basement to the existing water meter connection to the Village water main and flushing the new service.

Before beginning work, the Village Representatives will notify you when they will be on the Property to perform the work. It is your responsibility to provide reasonable access and a working area for the Village Representatives at the service line and water meter location as requested by the Village Representatives. The Village Representatives may continue to enter onto the Property until construction is completed and you and the Village accept the work.

**RIGHT-OF-ENTRY:**

**By signing and returning this Right of Entry, you grant** the Village and its Village Representatives the right to enter the Property between Click or tap to enter a date. through Click or tap to enter a date. between the hours of 7:00 a.m. and 6:00 p.m. The right to enter the Property is for the following purposes:

1. Survey and take photographs and videos of the interior and exterior of the Property; and
2. Replacement of your lead or galvanized iron/steel Service Line.

The Village Representatives will suitably identify themselves prior to entering the Property.

**PLEASE NOTE: You and the Village agree and understand that Lead Service Line Replacement cannot begin until the Village has on file your signed Right of Entry.**

In consideration of the foregoing, you affirm that you have a property interest in the Property, either by lease or ownership or are otherwise authorized to grant to the Village a Right of Entry to allow the Village and Village Representatives to enter the Property, to take photographs and videos of the interior and exterior of the Property in the area of the water service line before and after installation, to bring workers, material, equipment, and supplies onto Your Property and to perform the Lead Service Line Replacement on the Property.

**Restoration to preconstruction conditions will not always be possible, and the extent of reconstruction will be discussed with you and agreed upon prior to beginning the work. At that time, you will be asked to sign a separate Property Owner's Agreement that lists the extent of demolition and restoration. At that time, you may decline to participate in the Lead Service Line Replacement if you wish.**

The Village Representatives will connect the new copper service line to the existing plumbing at the entry point into the Property. The Village is not responsible for any interior plumbing nor for compliance with the Illinois Plumbing Code requirements or other codes once the service line enters the Property. It is the property owner's responsibility to replace interior plumbing when and where necessary or required by the local regulations.

While the Village will pay to replace the full water service line, this work does not change ownership or maintenance obligations from the existing requirements as defined in **Chapter 7-12-11-4-2(A)3** of the Village of Anytown's Municipal Code.

**IN CONSIDERATION OF AND AS A CONDITION TO THE PERFORMANCE OF THE LEAD SERVICE LINE REPLACEMENT AND METER INSTALLATION, YOU, THE UNDERSIGNED, HEREBY RELEASE AND FOREVER DISCHARGE THE VILLAGE, VILLAGE REPRESENTATIVES, ITS EMPLOYEES, AND LEGAL REPRESENTATIVES (COLLECTIVELY THE "VILLAGE") FROM ALL LIABILITY INCLUDING BUT NOT LIMITED TO INJURY, DEATH, DAMAGE, OR LOSS TO YOUR PROPERTY, PERSONS, REAL PROPERTY, OR PERSONAL PROPERTY (COLLECTIVELY, "CLAIMS") IN CONNECTION WITH THE PERFORMANCE OF THE LEAD SERVICE LINE REPLACEMENT.**

525-535 West Jefferson Street • Springfield, Illinois 62761-0001 • [www.dph.illinois.gov](http://www.dph.illinois.gov)

## WAIVER OF COMPLETE LEAD SERVICE LINE REPLACEMENT

You are receiving this form because your property has been identified by your community water supply (CWS) as being served by a lead service line or galvanized service line located downstream of lead and you are refusing to allow the community water supply (CWS) to replace your entire service line.

The purpose of this form is to provide you, the property owner, with information necessary to make an informed decision about replacing your service line. In accordance with the Lead Service Line Replacement and Notification Act, Public Act 102-0613, the owner or operator of your CWS is required to replace your lead service line in its entirety, including any portion of the service line running on private property and within the building's plumbing at the first shut-off valve or 18 inches inside the building, whichever is shorter. If you deny the CWS the ability to perform a complete lead service line replacement, then you, the property owner, must sign this waiver form in accordance with 415 ILCS 5/17.12 (ff)(1)(D) and 17.12 (ii).

The following items should be considered by property owners regarding lead service line replacement:

- ***Lead service lines and galvanized service lines downstream of lead can be significant contributors of lead contamination in drinking (tap) water through the corrosion of these materials.*** Service lines are pipes that carry drinking water from the CWS water main to a home or building. A study published by American Water Works Association (AWWA) Water Research Foundation (2008) "Contributions of Service Line and Plumbing Fixtures to Lead and Copper Rule Compliance Issues" (Sandvig et al, 2008) estimates that 50% – 75% of lead in drinking water comes from lead service lines.
- ***Lead is a toxic metal that is harmful to human health even at low exposure levels.*** Young children are particularly vulnerable to lead. The adverse health effects of lead exposure include damage to the brain and nervous system, slowed growth and development, learning and behavior problems, hearing and speech problems, lower IQ, decreased ability to pay attention, and underperformance in school. Please see the CDC's website, <https://www.cdc.gov/nceh/lead/prevention/health-effects.htm> for additional information regarding health effects of lead.
- ***Partial lead service line replacements can increase lead levels for long periods of time.*** Partial lead service line replacement means replacement of only a portion of a lead service line or a galvanized service line downstream of lead. Following a partial lead service line replacement, lead levels increase and construction activities such as digging and cutting release particulate lead. Particulate lead is a concern because the lead content can be very high. Additionally, new materials from partial lead service line replacements can increase corrosion or create galvanic corrosion.
- ***Property owners of nonresidential properties or properties operating as rental property have responsibilities under the Lead Service Line Replacement and Notification Act after denial of complete lead service line replacement.*** In accordance with 415 ILCS 5/17.12 (ff), owners of nonresidential buildings or a residence operating as a rental property shall be responsible for installing and maintaining certified point-of-use filters for the reduction of lead (NSF/ANSI Standard 53) and

particulates (NSF/ANSI Standard 42) at all plumbing fixtures intended to supply water for the purposes of drinking, food preparation, or making baby formula until such time that the property owner has affected the remaining portions of the lead or galvanized service line to be replaced.

- ***Unsafe conditions and knowledge of the remaining lead piping must be disclosed appropriately.*** Waiver or denial of complete replacement of a lead service line may create unsafe concentrations of lead and/or unsafe conditions relating to the remaining lead water pipe. If the property is a residential real property as defined by the Residential Real Property Disclosure Act (765 ILCS 77/5), appropriate disclosure shall be made at any transfer of sale, exchange, installment land sale contract, assignment of beneficial interest, lease with an option to purchase, ground lease, or assignment of ground lease.
- ***Service lines are plumbing and are required to be replaced by individuals authorized by the Plumbing License Law (225 ILCS 320/3).*** Service lines are plumbing as defined by the Plumbing License Law (225 ILCS 320/3). As plumbing, service lines are required to be repaired, replaced, and installed by authorized individuals and in accordance with the requirements of the Illinois Plumbing Code (77 Ill. Adm. Code 890).
- ***If the property is operating as a childcare operation, there are additional requirements regarding lead in drinking water under Department of Family and Children Services (DCFS) licensing standards.*** Under DCFS licensing standards, changes in water profile including changes to the water service line require retesting of the drinking water for presence of lead. Where lead is detected at or above DCFS's action level, a mitigation plan to reduce the concentration of lead is required.

More information about lead in drinking water and the effects of lead can be found at IDPH's website: <https://dph.illinois.gov>.

In consideration of the above information, IDPH strongly recommends you allow your CWS to replace your lead service line in its entirety. If you choose to waive and deny a complete lead service line replacement at your property, this form must be completed and returned to your CWS. Sections 1,2, and 3 of this form are to be completed by the CWS and Sections 4 and 5 of this form are to be completed by, you, the property owner of the affected property.

## WAIVER OF COMPLETE LEAD SERVICE LINE REPLACEMENT

Sections 1, 2, and 3 must be completed by the CWS prior to providing the form to the property owner.

| <b>SECTION 5: DENIAL OF COMPLETE LEAD SERVICE LINE REPLACEMENT</b>  |       |
| <input type="checkbox"/> By signing this waiver, I acknowledge that I am the property owner of the affected property located at the address listed in Section 3 of this form and I have been informed by the CWS that my property has a lead service line. I have read and understand the information provided within this waiver regarding the hazards of lead in drinking water, partial lead service line replacement, and Illinois laws about responsibilities of property owners for providing filters, disclosing the presence of lead water service lines, and requirements for child care facilities. |       |
| <input type="checkbox"/> By signing this waiver, I acknowledge that I am waiving the community water supply's requirement to replace my lead service line in its entirety. I acknowledge that this waiver will result in a partial lead service line replacement and it may be unsafe to drink, cook with, or otherwise consume water from the tap, unless it has been filtered with a filter certified to meet NSF/ANSI Standard 53 and 42.  |       |
| Signature   | Date  |

All parties should retain a copy of this form for their records. The Community Water Supply must also provide notification to IDPH using the electronic forms located at <https://dph.illinois.gov/topics-services/environmental-health-protection/lead-in-water.html>.
